JOSEPH KAGAI

josephkagai635@gmail.com | +1 (979) 600-5310 | California

Summary

Results-driven Software Engineer with expertise in backend development, CI/CD automation, and cloud deployment. Achieved a 30% reduction in API latency and improved deployment efficiency by 50%. Ready to enhance system performance and scalability.

Skills

Backend development (Python, Django, Flask, FastAPI)
Restful API design
CI/CD pipeline automation
Version control (Git and GitHub)

Frontend development (HTML5, CSS3, JavaScript, Bootstrap)
Database management (MySQL, SQLite)
Cloud deployment and containerization
System performance optimization
Linux server configuration
IoT systems integration

Experience

Mcdave Holdings Limited
Software Engineer
05/2024 - 01/2026

Engineered scalable web applications for order management and production monitoring using Django REST Framework, reducing API latency by 30%.
Automated CI/CD pipelines with GitLab, cutting deployment time by 50% and improving release reliability.
Integrated payment gateways and third-party APIs (SMS, OAuth2) to streamline user workflows.
Deployed containerized applications on AWS with Docker and Kubernetes, achieving 99.9% uptime.
Reduced response time by 40% through asynchronous task management with Celery and RabbitMQ.

Timwise Tech Solutions
Software Developer (Hybrid)
01/2023 - 01/2024

Digitized manual processes with a Django-based Leave Management System, cutting errors by 60%.
Enhanced data protection compliance by 75% with a secure Payroll System featuring role-based access control.
Migrated legacy systems to Azure cloud, achieving 25% reduction in operational costs.
Resolved hardware and software issues for over 150 users within SLA timelines through technical support.

Greenspace
Junior Software Engineer (Delmonte Contract)
04/2020 - 11/2022

Automated production tracking with IoT sensors and Python scripts, increasing data collection efficiency by 44.7%.
Configured Linux servers for real-time analytics to enhance supply chain optimization.
Delivered technical support for over 150 users, resolving hardware and software issues within SLA timelines.

Education and Training

Multimedia University

11/2018

Multimedia University
Bachelor of Arts in Information Technology
11/2016

- Relevant Coursework: Cloud Computing, Database Systems, Software Engineering

Certifications & Licenses

Backend Web Development- Python, Django, Databases, Git, API
